 - Common myths related to diabetes and diabetes care
 - Diabetes medication
 - Blood glucose levels and impacts - hyper and hypo glycemia
 - Footcare
 - Smoking and Alcohol
 - Community resources referral for diabetes care and healthy living support
 - Risk reduction
 - Diabetes care/wellness plans
- **Introduction to foot care**
 - Risks of injuries
 - Foot hygiene
 - Nail care
 - Corn/callus care
 - Skin care
 - Foot inspection
 - Footwear

Core Functions Description

Community Diabetes Support Workers

- 1. Health promotion:** Activities focused on prevention, that a worker undertakes to positively influence the health behavior of individuals, families and communities as well as the living and working conditions that influence their health.
- 2. Community outreach:** Activities undertaken by a worker to meet individuals and families where they are (home visits) to nurture a trust-building relationship and to offer information and support in a respectful manner, sometimes at non-traditional times.
- 3. Knowledge sharing:** Activities that are focused on presenting and disseminating basic, accurate knowledge pertaining to diabetes, diabetes prevention, nutrition, and foot care diabetes. To organize community meetings where the community can obtain information on diabetes from and interact with a diabetes professional.
- 4. Referrals:** Directing individuals or/and families requesting information beyond a worker's knowledge and skill, to professional Diabetes resources within or outside the community.
- 5. Advocacy:** The actions a community diabetes support worker takes to promote, support or protect the rights of individuals and/or families affected with diabetes to obtain the services they need, to speak on their behalf.
- 6. Care delivery:** Providing limited food care to individuals affected with diabetes.
